Subject: RE: Nobis's comments

I have reviewed the Nobis comment on Specific comment #6 and agree with their response. The two borings mentioned are currently outside the extent of the sheet pile wall and represent a potential pathway directly to the harbor at the present. The remedy for OU3A does appear to show these locations inside a newly constructed sheet pile wall that would extend beyond its current footprint. My concern was that these soils were not addressed as part of the IRA. It does appear that they addressed it in the FS.

Mike-

My recollection is that you were the author of EPA specific comment 6. Please consider Nobis' response to that comment in the submission I emailed on 11/28 and respond to the group with your thoughts on the response. Thank you.

Ginny Lombardo, Chief

Remediation & Restoration II Branch

Subject: Nobis's comments

Hi Ginny,

As you await our comments on the Aerovox Phase III, I am sending you Nobis's comments on the Phase III, Nobis's comments on EPA's comments to the Phase III, and Nobis's comment on the City of New Bedford's comments to the Phase III.

I have reviewed Nobis's comments. At this time, I don't have any reason to disagree with their comments. However, I will be consolidating my review comments with Gerard's and Nobis's, so please know that the attached comments are "Draft" and do not yet fully represent MassDEP's stance on the Phase III.

Thanks,

Angela Gallagher
